**29970 Quick Thaw**  
Ice and Snow Melt with Blue Marker

### Directions For Use

Remove as much snow and ice as possible before application. Sprinkle uniformly on remaining snow and ice at the rate of 1 – 4 lbs per 500 sq ft depending on conditions. If applied at the beginning of the snowfall or freeze, removal will be easier. Apply uniformly and do not use in excessive quantities.

**CONCRETE CAUTION:** Special additives minimize flaking and pitting on cured concrete when applied as directed. Do not use on concrete that is less than one year old, or that was not properly mixed, finished or cured. Flaking may occur with the use of any ice melt product on substandard concrete. If the concrete meets the recommendations of the American Concrete Institute, **Quick Thaw** can safely be applied as instructed.

### Precautions

**Caution. Keep Out of Reach of Children.** Harmful if swallowed. May irritate eyes.

### First Aid Measures

**Eyes:** Flush with water at least 15 minutes. If irritation persists, consult a physician.  
**Skin:** Wash with soap and water. If irritation persists, consult a physician. Wash hands after using.
