

Super BioBugs Bio-Flow GT was developed to comply with municipality code as a safe and effective bioremediation for grease traps. Super BioBugs Bio-Flow GT contains NO surfactants, NO perfumes, NO dyes and NO solvents. As a result, Super BioBugs Bio-Flow GT will not affect the recyclability and safety of outgoing water.

Super BioBugs Bio-Flow GT contains 750 billion enzyme producing bacteria per gallon. The bacteria naturally break-down carbohydrates, lipids (grease) and proteins that cause drainage blocks and odor complaints to and from grease traps. Continual use of Super BioBugs Bio-Flow GT will result in biofilm development, a beneficial colony of non-pathogenic bacteria that work to maintain drain health, water quality and removal efficiency of Oil & Grease, BOD and TSS.

### DIRECTIONS

For best results, drains and grease traps should be treated daily at a time of low flow to allow time for the bacteria to work (usually at the end of the day or late at night.) Use of a timed metering pump will ensure maximum performance.

### WARNING

Causes mild skin irritation.

Contains no hazardous ingredients above reportable levels.

### PRECAUTIONARY STATEMENT

**Prevention:** If skin irritation occurs: Get medical advice/attention
