

## Features

Lift Station is formulated to work within the design of the station platform by floating up and down with the rise and fall of the unit. The floating action dissolves grease and oil, softens solid waste and traps unpleasant odors. In addition, it reduces and contains foam, degreases station equipment, and lengthens the interval between major scrubbing of the inside of the station.

## Directions For Use

Introduce directly into the station until it reaches a minimum level of 1-2" floating on top of the liquid. The quantity required depends on the diameter of the station.
