

DIRECTIONS

Gone O₂ can be diluted directly into the solution tank of a carpet extractor. You can also dilute Gone O₂ into a sprayer. Pre-spray the carpet and then use a carpet extractor with fresh water to rinse. Once carpet and upholstery have been cleaned, a fan should be used to help the surface dry. Always make sure that the surface is completely dry before allowing regular traffic back into the area. A color fastness test in a hidden area should always be performed before extraction on colored carpet and fabrics.

Dilutions

Gone O₂ should be diluted at a rate of 2 oz. per gallon of water. (1:64) Gone O₂ can also be used as a pre-spray for all traffic areas. To use this product as a pre-spray, dilute anywhere from 2 to 6 ounces per gallon depending on the amount of soil in the traffic areas. If traffic areas are heavily soiled you should use a traffic pre-spray.

Gone O₂ can also be used as a bonnet cleaning solution at 2 oz per gallon.

HARPER SUPPLY

Gone O₂

Low Foaming Conditioning and Brightening Carpet Cleaner

1 GALLON (128 FL. OZ.)

Gone O₂ is a proprietary blend of low foaming surfactant, organic acids, water conditioning agents and optical brighteners. It is a highly effective cleaner designed to aggressively clean all carpet types without harming the fabric or any stain resistant properties that may exist. Gone O₂ can be used with all hot and cold water extraction equipment. It's mild pH insures compatibility with all carpeting, fabric and cleaning equipment.

The carpet or furniture to be cleaned should always be vacuumed and free of debris before extraction to avoid causing further stains.

WARNING

Causes skin irritation.

Causes serious eye irritation.

Contains: Alcohols, C9-11, ethoxylated (CAS #68439-46-3), Hydrogen peroxide (CAS #7722-84-1), D-limonene (CAS #5989-27-5)
